# Red-green color blindness: reduced color palette

This is a reduced color palette, which can be used for red-green color blindness. We used the [Viz Palette Tool](#) to see how well these colors can be differentiated from each other.

If you have additional questions about accessibility, please contact [markus.dubielzig@siemens.com](mailto:markus.dubielzig@siemens.com).

# Red-green color blindness: simulation

Here, you can see how the colors displayed on the left would look to people with red-green color blindness. We used the color [contrast plugin](#) to simulate red-green color blindness.
